

Electrical Testing & Verification Courses

The Commission for Energy Regulation (CER) has directed that, from July 2013, all electrical Verification & Certification courses, which grant a Qualified Certifier (QC) number be accredited by a recognised provider.

We are the first private sector provider to meet the **CER** directive and are **recognised by RECI / ECSSA**.

Course Types & Prices

There are two main types of ET&V course that iSkill Training provides; a **2 Day** course and a **4 Day** course:

- The **2 Day** course is suitable for electricians who are **very experienced and familiar** with testing & verification. It is very intensive, and the learners wishing to undertake this type of course should be aware of this fact. The price for the course is **€395**.
- The **4 Day** course is intended for electricians who are **new to testing & verification, or have little experience**, and would like to spend more time on mastering the field. It provides more “hands-on” learning time, and practice, as well as allows to familiarise oneself with the aspects governing this particular field of electrical trade. The price for the course is **€695**.
- A deposit of **€50** is required to secure a place on the course

The price for the course includes certification and registration cost from City & Guilds. Class sizes are limited to 4-8 people. Tea, Coffee and biscuits will be provided on the morning break. A selection of sandwiches and wraps will be provided at lunch time with a choice of tea or coffee also. Alternatively, there is a selection of amenities close by if you wish to use.

Please note that other types of ET&V courses can be arranged depending on requirement (evening, weekend, corporate).

Course Details

The ET&V course consists of 4 modules:

- **visual inspection**
- **initial verification**
- **periodic testing & verification**
- **written exam**

The qualification is from **City & Guilds** which is recognised worldwide, and lasts five years. It is compliant with the CER, RECI and ECSSA, and can be used to obtain a Qualified Certifier number.

Attendees can use our test equipment, or use their own (provided it has a valid calibration cert that is no more than a year old).

The ET&V course is taught in a purpose built workshops, and each learner has access to a training rig that is 18 sq. meters in size.

ETCI Rules books and Megger Testing meter units are available to purchase during the course at a discount price.

Course Entry Requirements

Candidates wishing to participate in the ET&V Course should be **qualified electricians** and have previously obtained a **Level 6 of the NQAI Certificate in Electrical Craft Practice or equivalent**. Attendees should bring their National Craft Cert/Card or equivalent for registration purposes, and as a confirmation of their trade.

Results

Normally the **provisional results** are issued **within a couple of weeks** after course completion, and this is sufficient to obtain a **QC number**. Upon receipt of the provisional results letter, a learner should go to either RECI or ECSSA in order to get the QC number. The actual certificate comes from **City & Guilds** and normally takes a couple of weeks.

Location

iSkill Training Ltd provide the course at the following address:

- Dublin – Unit 12 Bluebell Business Park, Old Naas Road, Dublin 12
